

## Brave Women Get Short Hair Styles

It takes courage for every woman that goes in for a short hair style after having long hair. Short hair styles can exude a sense of style and class for any woman. Short hair styles are a wonderful way to express the inner changes of attitude within a woman. Now, that is if she has always worn her hair long. If she has always worn it short then no inner change can be attributed to her new short hair style.

Today women work more and more outside the home and find themselves rushed for time. Buying more time for her can be accomplished by getting her hair cut short. Long hair takes much more care than short hair. It can be washed and styled in a few minutes instead of the longer time it takes to style long hair. Washing, blow drying and styling takes more effort with long hair. If a woman is lucky enough to have curly hair, short hair can be styled with a quick scrunching of the fingertip and a few shots of hair spray in just the right places to finish off the task. More maintenance is needed for short hair style. That is because women must go in to the salon to get more frequent cuts to keep up the style. Your stylist will need to see you every four to six weeks to keep your short hair cut trimmed and fresh.

For the woman just getting a short hair style, picking which style she wants can be a daunting task. A really good tip is to ask your stylist for a suggestion on what cut would look good on you. The stylists will more than likely know the right cut for your face shape and hair texture. If you do not like her suggestion, you can always look thru the short hair cut books or magazines and chose one from there. Another option is go online and find a Website that will let you upload your photo and then digitally try on different styles to see which ones you like. So go ahead and take the plunge into getting a new short hair style. Just let it grow back if you do not like it. Take pride in your bravery and doing something new with your hair.
